

Article Review Assignment
Eduu451/551 Brandman University
Spring/Summer 2010/Roberts

Read any two articles or research papers from the list posted on the Ed551 website and write a review of each article. Each review is to include the following elements:

1. A correct APA style bibliographic entry for the article
2. A one paragraph abstract of the article that includes the purpose of the article and a summary of its conclusions.
3. A one paragraph critical assessment of the article that stresses how the arguments given in support of the conclusions do or do not support that conclusion.
4. A brief analysis of the potential impact that the conclusions drawn by the article's author may have on your use of computer technology in the classroom.

Your reviews will be read for content, form and format; that is, what you say, how you say it and the degree to which the review conforms to APA format for the preparation of manuscripts.

Quotations must be referenced correctly using the APA citation format. Pay particular attention to the citing of secondary sources (i.e. quoting a quote in the article you are reviewing that was made by someone other than the author of the article).
